Roger Chantel

Kingman, AZ 86401

2012 AUG -8 P 1: 10

Arizona Corporation Commission

DOCKETED

AUG - 8 2012

Gary Pierce, Paul Newman, Bob Stump and Sandra D. Kennedy
Administrative Staff of the Commission and Wesley Van Cleve,
Attorney for Arizona Corporation Commission

To all of the above;

I understand that you have a large number of issues that come in front of you each day. The issue that I am bringing in front of you may seem small to you, but to me it is a large issue. It threatens my life by the possibility of the lines snapping or the poles breaking, which will most likely rip the wires out of my house, thus causing me not to have power to run my breathing machine. The issue is the high voltage transmission lines and poles that Mohave Electric has abandoned on my property. It has been established in a court of law that these high voltage transmission lines have not been used to transmit electricity for about four years nor have they had any maintenance performed on them. It has been established that Mohave Electric Cooperative is the owner and the responsible party to file an Application for Abandonment. I am including a copy of a letter that I sent MEC.

The problem in this case is simple. The Administrative Staff writes MEC a letter saying that it has been brought to the administration's attention that MEC has some high voltage transmission poles and lines that have not transmitted electricity through them for about four years. This would appear that these line are abandoned and fall within A.A.C. R14-2-202 B (1) and (2). This law requires a utility to file an Application for Disconnect and Abandonment. I am sure the MEC's attorneys will act in bad faith and tell the Commission that they have not abandoned these lines. The Commission's response should be that the law requires them to file notice with the Commission when they disconnect and / or abandon and discontinue use of high voltage power lines. The facts are clear. MEC discontinued transmitting high voltage electricity through these lines on September 16, 2008. I am asking the Commission to intervene on my behalf. Please ask them to comply with the laws.

I have communicated with Wesley Van Cleve about this law being mandatory. The issue of this law being mandatory is in front of the Attorney General Office and a number of related issues have been or are going to be submitted to State Legislatures.

I am asking the Commission to intervene by the Commission giving notice to Mohave Electric Cooperative to file an Application for Abandonment of HIGH VOLTAGE TRANSMISSION LINES that are no longer being used. Once MEC has

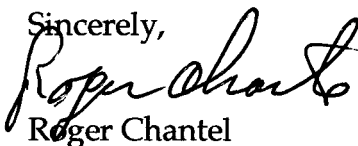

filed the application under AAC R14-2-202 B (1) and (2), the Commission can make its decision as to whether these lines are in use and are being maintained.

In an effort to help me understand why your authority is not putting any effort forward to help me, I am requesting that you supply me copies of all documents and communication, such as letters, emails and names of staff that have talked to MEC's attorneys and employees. This information is requested under the Freedom and Information Act. If the staff of the Arizona Corporation intends to give MEC notice to comply to the Arizona Administrative Codes, could you be so kind as to inform me of your intentions within ten day of the date of this letter. The reason for this request is the information that you supply me maybe cause for not filing a Motion to Compel with the Appeals Court.

Please understand the there is a difference in reason for your request for action. The attorneys for MEC do this for the purpose of generating money for them selves. I write you these letters because evidence has been submitted to the lower court showing that these abandoned lines have a large sag that is over the structure that MEC claimed was the issue as to why it disconnected the electricity to my place of residence. The Survey results show that this pole is out of center by about a two and half feet. This means the line on the other side of the pole is getting tighter and the lines are getting closer to this structure. If we have any kind of strong weather conditions it could snap these lines. If these poles break or a line snaps it will rip or damage the lines in my house. The sensible solution to this problem is for the staff of Arizona Corporation Commission to give MEC notice to comply with A.A.C. R14-2-201 B (1) and (2).

I have emailed this letter to you, but I am also sending you a certified copy of this letter and its contents in the US Mail. I will include a copy of the letter sent to Mohave Electric Cooperative asking them to voluntary comply with the laws and a copy of the survey results.

I am asking for your help in this matter. Please let me know within ten days of the date of this letter.

Sincerely,

Roger Chantel

[REDACTED]
Kingman, AZ 86401

To the Mohave Electric Cooperative Board of Directors:
Lyn R. Opalka, John Nelssen, Chester Moreland, Carlos Tejeda, Jack Christy, Jim Ennes, Joe Anderson, Michael Bartelt and John Elkins
and Executive Officer: Tyler Carlson

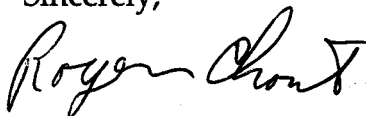

Dear Board Members and Executive Officer,

I have been trying to resolve a number of issues with Mohave Electric Cooperative since 2005. One of those issues is the existence of high voltage transmission lines that run over my property. In the court case Chantel's vs Mohave Electric Cooperative, it has been established in this case that MEC is the owner of the lines and poles that exist on my property. This case established the fact that MEC no longer transmits high voltage electricity through these lines. This court case established the fact that MEC has disconnected the Chantel's place of residence and discontinued transmitting electricity on or about September 16, 2008. It will soon be four years since MEC has used these lines and poles. There is no evidence that MEC has done any kind of maintenance on these lines and poles within this time. By simple common sense one can conclude that MEC has abandoned these lines and poles. The Arizona Administrative Codes require MEC to file an application for abandonment under R14-2-202 B 1, 2, 3. MEC's personnel, as well as MEC's legal counsel, claimed that the railroad had lines connected to the lines that MEC abandoned. Since the railroad was connected to the abandoned lines, the law requires MEC to included the railroad's electrical needs in the application for abandonment.

I am asking you to included a reinstatement of electricity to the residence that MEC disconnected in 2008. R14-2-211 A 5 and 6 requires a utility to provide electricity for medical conditions.

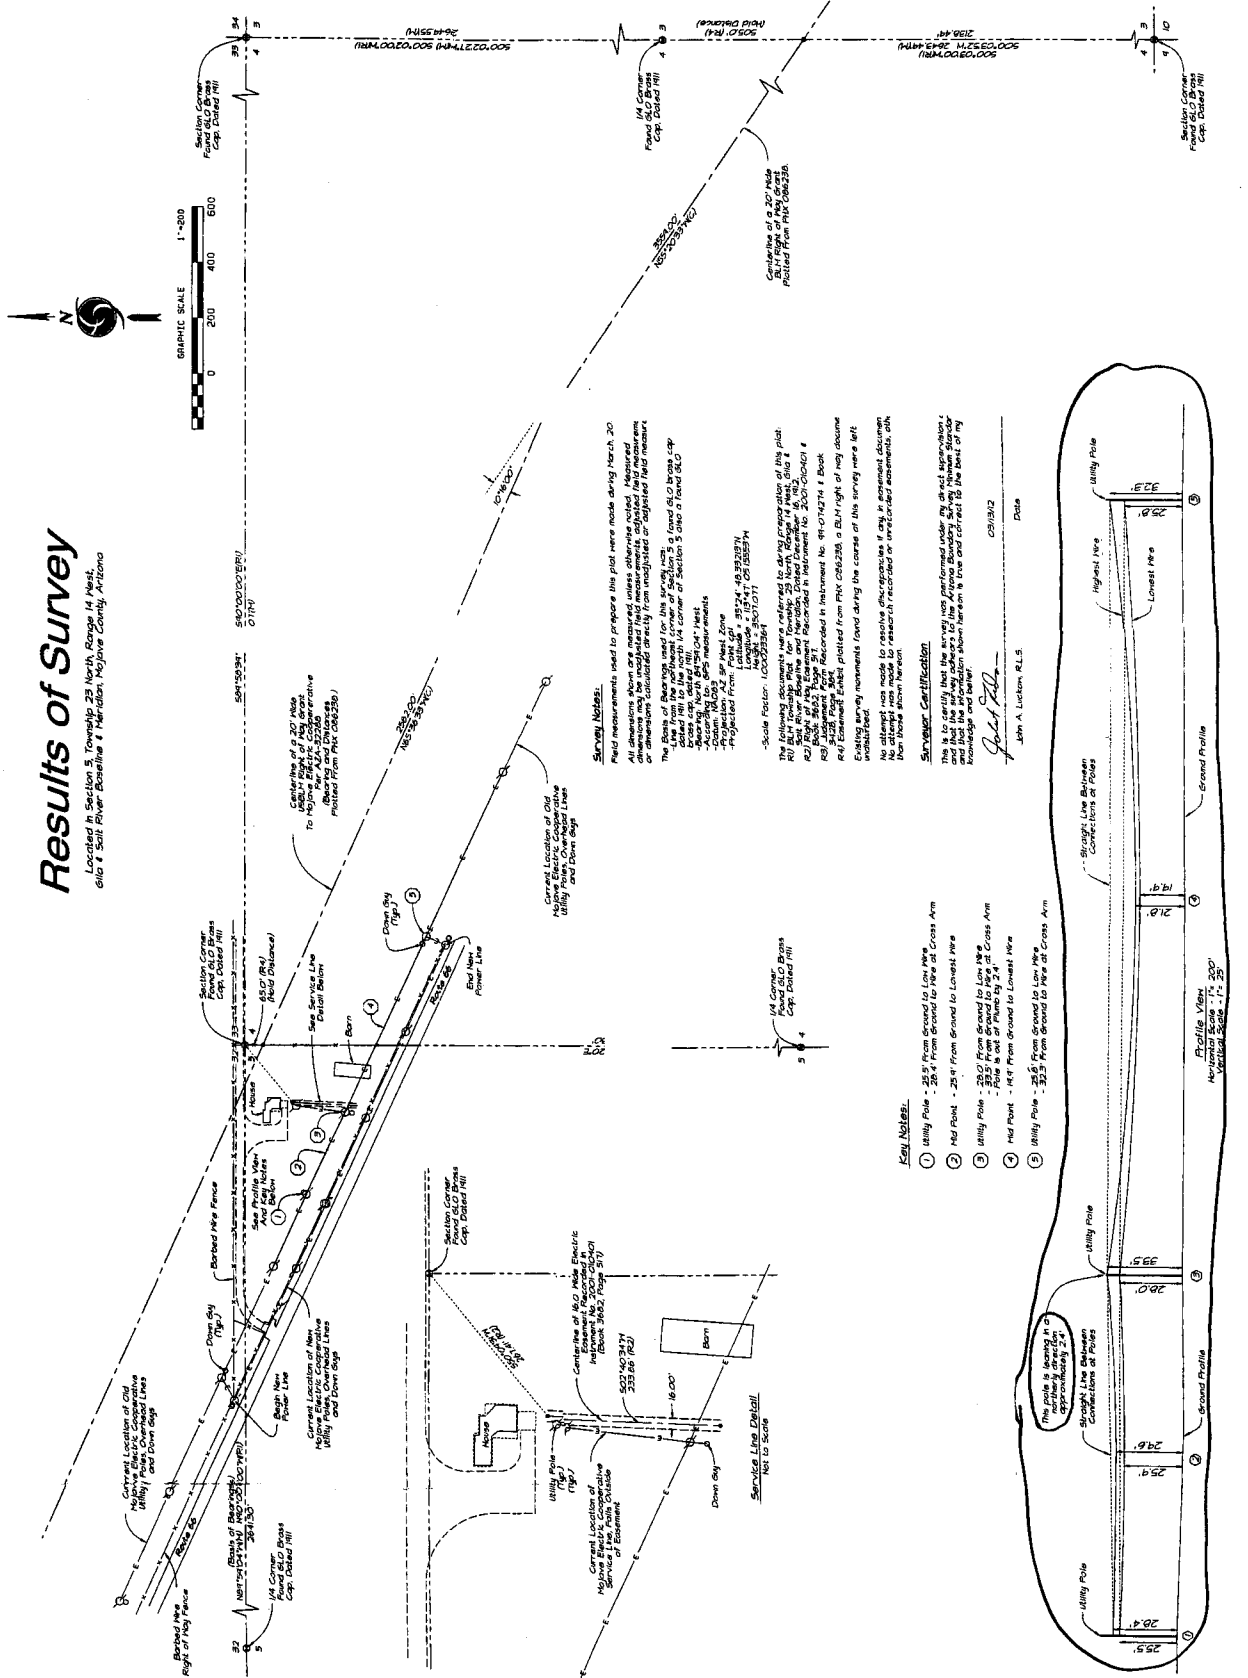

I am asking you to voluntarily comply with these rules and regulations. Your good faith actions will go a long way towards resolving the issues that exist. If you intend to comply voluntarily, please send me a letter within 10 days of the above date, stating the approximate date you will submit this application to the ACC. If you decide not to comply to the laws voluntarily, you will force me to ask the court to compel you to comply with the law.

Sincerely,
